

GitHub Pages Portfolio Checklist

This checklist will help you build a **professional portfolio** that meets the program's standards.

Tick off each item as you complete it.

Career Aspirations (About Me Section) / Landing Page

Completed Share your **future goals**: the type of work environment you're looking for, preferred roles, ideal job description, and what kind of team you want to work with.

Completed Include a personal “**About Me**” section that highlights your interests, values, and aspirations.

GitHub Pages Organization

Completed Organize your GitHub Pages into **clear, well-structured sections** for better readability and navigation.

Completed **Clean your GitHub repositories** so they are less cluttered (delete unused files, add README.md, clear old branches).

Branding

Completed Add the **official dae logo** to your homepage and any additional GitHub Pages.

Personal Details

Completed Display your **full name** on your landing page.

Completed Display your **graduation date** on your landing page.

Profile Photo

Completed Upload a **clear, professional headshot** to personalize your profile.

Extra for a Strong Portfolio (Recommended)

Completed Link to at least **2–3 of your best projects** with descriptions and images.

Completed Make sure your portfolio looks **good on both mobile and desktop**.

Completed Add **contact information** (email, LinkedIn, GitHub link).

Completed Keep **consistent fonts, colors, and spacing**.
