

Database & Backend Validation Report

✓ VALIDATED

Week 3 closeout evidence

The DeRexi backend was started successfully in the local FastAPI environment and tested through Swagger UI. Two database-backed GET endpoints were executed: /departments and /users. Both returned HTTP 200 responses and live JSON records, confirming that the API layer is communicating with the project database as intended.

TEST 01 GET /departments

GET /departments List Departments

Parameters

No parameters

ExecuteClear

Responses

Curl

```
curl -X 'GET' \
'http://127.0.0.1:8000/departments' \
-H 'accept: */*'

```

Request URL

```
http://127.0.0.1:8000/departments

```

Server response

CodeDetails

```
200
Response body
[
  {
    "id": 1,
    "name": "Compliance"
  },
  {
    "id": 2,
    "name": "Information Technology"
  },
  {
    "id": 3,
    "name": "Operations"
  },
  {
    "id": 4,
    "name": "Human Resources"
  },
  {
    "id": 5,
    "name": "Marketing"
  },
  {
    "id": 6,
    "name": "Lending"
  }
]
```

RESULT HTTP 200 • 7 department records returned
Compliance, Information Technology, Operations, Human Resources, Marketing, Lending, Wealth Management

User Data Retrieval

API execution + response evidence

TEST 02 GET /users

GET /users List Users

Parameters

No parameters

Execute Clear

Responses

Curl

```
curl -X 'GET' \
'http://127.0.0.1:8000/users' \
-H 'accept: */*'
```

Request URL

```
http://127.0.0.1:8000/users
```

Server response

Code Details

RESPONSE EXCERPT

```
[
  {"id": 1, "full_name": "Dana Brooks",
    "department": "Compliance", "role": "System Administrator"},
  {"id": 2, "full_name": "Lucy Chen",
    "department": "Information Technology", "role": "System Administrator"},
  {"id": 3, "full_name": "Tom Bennett",
    "department": "Operations", "role": "Employee"},
  ...
]
```

VALIDATION SUMMARY

- FastAPI application started successfully under Uvicorn.
- Swagger UI executed both endpoints without errors.
- Database records were returned as JSON with HTTP 200 status.
- Department, user, role, and relationship fields are being retrieved as expected.

Conclusion: Week 3 database and backend validation completed successfully.
